

INF 559 – Spring 2020

Lab #1: AWS File Backup

Due: April 2, Thursday 3:59 PM PT

10 points

The purpose of this lab is to help you get set up and familiar with Amazon's AWS cloud environment. This will also serve as the foundation for a homework on DynamoDB later.

Task:

1. Create an AWS free tier account from <https://aws.amazon.com/free/>
2. Follow the steps outlined on the following link: <https://aws.amazon.com/getting-started/hands-on/backup-files-to-amazon-s3/>
 - a. Take a screenshot after you have successfully uploaded the file in step 3
 - b. Take another screenshot when you have deleted the file and bucket in step 5
 - c. **Make sure your account details are visible in the top right in both screenshots.**
 - d. You can choose to backup and restore any file you want. An example would be this PDF file itself.

Submission:

1. Submit a single file on Blackboard **FirstName_LastName_lab1.zip**
2. The zip should contain only 2 image files - **FirstName_LastName_step3** and **FirstName_LastName_step5**.
3. As mentioned above, **make sure your account details are visible in the top right in both screenshots.**

Grading Criteria:

1. Late submissions (up to 24 hours) will be penalized by 20%. No credit will be given after 24 hours of submission deadline.
2. No points will be awarded If account details are not visible in screenshot.
